1962
INVENTORY

Municipal Waste Facilities

REGION I

Connecticut
Maine
Massachusetts
New Hampshire
Rhode Island
Vermont

U. S. DEPARTMENT OF
HEALTH, EDUCATION, AND WELFARE
Public Health Service
Division of Water Supply and Pollution Control
Basic Data Branch
Washington, D. C.

For administrative purposes, the U. S. Department of Health, Education, and Welfare divides the States of the Nation into nine regional groupings. The 1962 INVENTORY OF MUNICIPAL WASTE FACILITIES is published in nine volumes--one for each region as shown below:

Region I - PHS Publication No. 1065 - Volume 1
Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont

Region II - PHS Publication No. 1065 - Volume 2
Delaware, New Jersey, New York, Pennsylvania

Region III - PHS Publication No. 1065 - Volume 3
District of Columbia, Kentucky, Maryland, North Carolina, Virginia, West Virginia, Puerto Rico

Region IV - PHS Publication No. 1065 - Volume 4
Alabama, Florida, Georgia, Mississippi, South Carolina, Tennessee

Region V - PHS Publication No. 1065 - Volume 5
Illinois, Indiana, Michigan, Ohio, Wisconsin

Region VI - PHS Publication No. 1065 - Volume 6
Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota

Region VII - PHS Publication No. 1065 - Volume 7
Arkansas, Louisiana, New Mexico, Oklahoma, Texas

Region VIII - PHS Publication No. 1065 - Volume 8
Colorado, Idaho, Montana, Utah, Wyoming

Region IX - PHS Publication No. 1065 - Volume 9
Alaska, Arizona, California, Hawaii, Nevada, Oregon, Washington

Public Health Service Publication No. 1065

Volume 1

1963

For sale by the Superintendent of Documents, U.S. Government Printing Office
Washington, D.C., 20402 - Price 50 cents

FOREWORD

Clean water in sufficient quantity when and where it is needed has become a cry of the 1960's. Water has always been basic to man's survival -- and it is essential to his economic and social well-being. But never has this Nation required so much water for homes, factories, farms and recreation as it does today. Nor have the discarded wastes of cities, industry and agriculture ever posed such enormous threats to our water resource as they do today.

Development of the water resource presently involves an expenditure of about $10 billion a year in this country. Water pollution control has high priority in this development. New municipal and industrial waste treatment works over the next 20 years have been priced out at $42 billion. Both Congress and State Legislatures have enacted laws and there are both Federal and State programs, working very closely together, to protect the quality of the Nation's water resources.

We could ill afford to expend such great sums and effort for water pollution prevention and abatement without accurate bookkeeping on accomplishments and further needs. For many years the Public Health Service has collected, analyzed and published data on municipal sewage disposal systems and waste treatment facilities. The last such publication was in 1958 covering 1957 data. It contained, in addition to the municipal data, limited information on industrial waste treatment facilities (PHS Publication No. 622).

This newest report contains data on only the municipal waste treatment facilities as of January 1, 1962. Grateful acknowledgment is made to the individual State agencies who assisted in the inventory, and which are named at the beginning of each State listing.

G. E. McCALLUM
Assistant Surgeon General
Chief, Division of
Water Supply and Pollution Control

NOTES REGARDING TABULATIONS

GENERAL

This Inventory contains the latest available data for all sources of municipal pollution which are of significance in water pollution control programs.

Each individual item listed in column 1 is defined as an "entry"

In the listings, each non-community entry is referred to the nearest community, whenever possible. Entries appear in alphabetical order according to community. Entries listed under the same community are alphabetized by name, under that community.

When requested by the cooperating agency, entries for institutions, schools, shopping centers, motels, etc., are listed alphabetically after the last municipal entry.

Following each State listing is a table showing those sewage disposal facilities which serve more than one of the entries, together with the names of all entries which are served by the particular facility.

An "x" in the listings indicates that the data called for are not available. A dash "-" signifies that the data called for do not apply to the entry. An asterisk "*" indicates that a "Remark" is entered in column 15.

COLUMN (1) COMMUNITY, SEWER OR SANITARY DISTRICT OR INSTITUTION

Entries marked with a star "★" are disposal facilities which serve one or more additional entries.

The following abbreviations are used.

Auth.	--Authority
Co.	--County
Col.	--College
Comm.	--Commission
D. or Dist.	--District
D. R.	--Dude Ranch
Est.	--Estate
Fed. Hous. Proj.	--Federal Housing Project
F. H. A.	--Federal Housing Administration
Hosp.	--Hospital
Hts.	--Heights
Ind. Res.	--Indian Reservation
Inst.	--Institute, Institution
Jct.	--Junction
Mon.	--Monument
M. U. D.	--Municipal Utility District
M. V.	--Mill Village
Nat.	--National
Penit.	--Penitentiary
P.C.	--Permanent Camp (Recreation, Forest, or other)
Pk.	--Park
P. H. A. or F. P. H. A.	--Public Housing Administration
P. U. D.	--Public Utility District
San.	--Sanatorium, Sanitarium
Sch.	--School
S. D.	--Sanitary, Sanitation or Sewer District
Sec.	--Section
S. M. D.	--Sewer Maintenance District
Sta.	--Station
(T), To., Twp.	--Town or Township
Univ.	--University

COLUMN (2) COUNTY NAME

The name of the county in which the community, facility or institution is located.

COLUMN (3) 1960 CENSUS POPULATION

For communities, the entry shows the 1960 population, as reported by the U.S. Bureau of the Census, or taken from the 1961 edition of the Rand McNally Atlas. For institutions and others, the figure is the same as population served.

COLUMN (4) ESTIMATED POPULATION SERVED

The figure oppearing indicotes the estimoted totol number of people served by the facilities. A figure shown in porentheses indicates thot the entry is served by the facilities of onother entry (the lotter being indicoted in column 8). The populotion shown in porentheses is included in thot listed under the serving entry.

COLUMN (5) TYPE SEWER SYSTEM

The type sewer system is coded os follows·

S - Seporote (designed to corry domestic sewoge ond industriol woste seporotely from storm water runoff)

C - Combined (designed to corry domestic sewoge, industriol woste, ond storm woter runoff in the some sewer)

COLUMN (6) AVERAGE DAILY FLOW (MGD)

The octuol woste flow for the entry.

An "E" following the flow figure indicotes thot the flow hos been estimoted.

COLUMN (7) DESIGNED FOR

Top-line Entry - Averoge Doily Flow (MGD) - The flow for which the facilities were designed.

Bottom-line Entry - PE (1,000's) - The populotion equivolent, in thousonds, os meosured by BOD, for which the facilities were designed.

COLUMN (8) TREATMENT

The principol treotment devices ond methods ore identified by copitolized letters ond ore further described by subsequent lower cose letters.

In generol, the symbols ore orronged in the order of sewoge flow with sludge treotment symbols following thereafter. Combinotion units performing more than one function in o single structure ore denoted by enclosing the oppropriote symbols in porentheses. Enclosures in brockets indicote porollel or olternote operotion. Chlorinotion, where used, is usuolly noted only once for each plant regordless of whether octuol opplicotion is mode ot more thon one point.

See Appendix A for code.

COLUMN (9) SAME AS COLUMN (1)

COLUMN (10) MAJOR AND MINOR DRAINAGE BASIN

Top-line Entries - The mojor drainoge bosin in which the entry is locoted. See Appendix B for code.

Bottom-line Entries - The minor drainoge bosin in which the entry is located. See Appendix B for code.

COLUMN (10A) SUB-BASIN

The sub-bosin in which the entry is locoted. Not oll Stotes hove delineoted sub-bosin limits.

COLUMN (11) WATERCOURSE MILEAGE

For entries discharging either row or treoted sewoge into o river system, watercourse mileoges ore entered in occordonce with the coding system shown in Appendix C.

The column does not opply to entries dischorging onto lond or into lokes or on ocean. When doto oppeor in this column for such entries, the only purpose is to locote the entry.

COLUMN (12) DISCHARGE TO

The wotercourse or lond oreo to which the untreoted wostes or treotment plont effluent is dischorged.

The following obbreviotions ore used.

Ar. -Arroyo
Br. -Bronch, Brook

Co.	-Canal
Cr.	-Creek
E.	-East
Fk.	-Fork
L.	-Lake
Ld.	-Land
Lt.	-Little
N.	-North
Pd.	-Pond
R.	-River
S.	-South
Str.	-Stream
Trib.	-Tributary
W.	-West
Wa.	-Wash

COLUMN (13) POPULATION EQUIVALENT (BOD)

Top-line Entries - The Population Equivalent (BOD) of the untreated waste is entered on the top line, and followed by an "E" if estimated.

Bottom-line Entries - The Population Equivalent (BOD) of the treated waste, as discharged to the receiving area, is entered on the bottom line. If estimated, an "E" is added.

Note: When waste discharge is not into a body of water, but is rather onto land or into lagoons from which there is no overflow, the bottom line entry in this column may be shown in one of two ways:

Some States enter a figure showing the PE (BOD) of the wastes as they are discharged into these land areas or lagoons. Other States enter an "O" to indicate that no waste reaches a watercourse. In both cases exactly the same situation exists physically, only the method of describing it differs.

COLUMN (14) POLLUTION ABATEMENT NEEDS

Symbol		Explanatory Notes
0	New treatment facilities	This symbol indicates the need for a new plant when a "None" appears in column 8.
1	Enlargement of existing facilities	This symbol indicates a need for enlargement of the existing treatment plant shown in column 8. For example, addition of another filter to a trickling filter plant. When this symbol is used it indicates that the degree of treatment or the type of pollution control measures in use are considered to be adequate.
2	Addition of other treatment methods to existing facilities	This symbol indicates a need for addition of other treatment methods to the treatment plant shown in column 8. For example, the addition of trickling filters to a primary treatment plant. When this symbol is used the degree of treatment or the type of pollution control measures in use are not considered to be adequate without supplementation.
3	Chlorination	This is a specific requirement coming under symbol "2" above. It may be used either in conjunction with that symbol (as when chlorination plus other additions are needed), or in place of it (as when chlorination only is needed).
4	Replacement of existing plant	This symbol indicates a need for replacement of the existing treatment plant shown in column 8.

Symbol	Explanatory Notes
4 (contd.)	"Replacement" means that the plant or pollution control measures replaced will no longer be used. It is possible that this replacement may be by a plant or by pollution control measures providing the same degree of treatment as those which are replaced. This symbol provides for recognition of the fact that pollution reduction has been provided for, but that due to obsolescence, or for any other reason, the existing facilities are no longer capable of producing satisfactory results.
5	Improved operation or utilization of existing facilities
6	Connection to adequate existing sewer system
7	No project needed

COLUMN (15) REMARKS

Any pertinent remarks relating to the entry appear in this column.

APPENDIX A

TREATMENT CODE

The principal treatment devices and methods are identified by capital letters and are further described by subsequent lower case letters. In general, the symbols will be arranged in the order of sewage flow, with sludge treatment symbols following thereafter. Combination units performing more than one function in a single structure are denoted by enclosing the appropriate symbols in parentheses. Enclosures in brackets indicate parallel or alternate operation. Chlorination, where used is noted only once for each plant, regardless whether or not actual application is made at more than one point.

KEY TO SYMBOLS

A -----Aeration
- Ao---Activated sludge, diffused air aeration
- Ac---Contact aerators
- Ae---Extended Aeration
- Am--Activated sludge, mechanical aeration
- Ap---Aeration, plain, without sludge return

B -----Sludge beds
- Bo---Open
- Bc---Glass covered

C -----Settling tanks
- Ci---two story (Imhoff)
- Cm--mechanically equipped
- Cp---plain, hopper bottom or intermittently drained for cleaning
- Cs---septic tank
- Ct---multiple tray, mechanically equipped

D -----Digester, separate sludge
- Dc---with cover (fixed if not otherwise specified)
- D(cg)-gasometer in fixed cover
- De---gas used in engines (heat usually recovered)
- Df---with floating cover
- Dg---with gasometer cover
- Dh---gas used in heating
- Dm--stirring mechanism
- Do---open top
- Dp---unheated
- Dr---heated
- Ds---gas storage in separate holder
- Dt---stage digestion

E -----Chlorination
- Ec---with contact tank

APPENDIX A (cont'd.)

Eg---by chlorine gas
Eh---by hypochlorite

F -----Filters
Fc---contact beds
Fm--magnetite (straining)
Fo---roughing filters
Fr---rapid sand or other sand straining
Fs---intermittent sand
Ft---trickling (no further details)
Fth--high capacity
Ftn--fixed nozzle, standard capacity
Ftr--rotary distributor, standard capacity
Ftt--traveling distributor, standard capacity

G -----Grit chambers
Gh---without continuous removal mechanism
Gm--with continuous removal mechanism
Gp---grit pocket at screen chamber
Gw--separate grit washing device

H -----Sludge storage tanks (not second stage digestion units)
Hc---covered
Hm--with stirring or concentrating mechanism
Ho---open

I ------Sewage application to land
Ic----with cropping
Ip----percolation beds
Is----sub-surface application
Iu----land underdrained

K -----Chemical treatment - Flacculation. Chemical treatment-type units or equipment not necessarily complete or operated as chemical treatment
Ka---flocculation tank, air agitation
Kc---chemicals used
Km--flocculation tank, mechanical agitation
Kx---no chemicals used

L -----Lagoons
Le---evaporation lagoons
Lo---oxidation lagoons or ponds
Lp---lagoon for settling of sewage
Ls---sludge lagoons - not for treatment of sewage

O -----Grease removal or skimming tanks not incidentol to settling tanks
Oa---aerated tank (diffused air)
Om--mechanically equipped tank

S ------Screens
Sc---comminutor (screenings ground in sewage stream)
Si----intermediate screens (1/8" to 1/2" openings)
Sf----fine screen (less thon 1/8" openings)
Sg---screenings ground in seporate grinder and returned to sewoge flow
Sh---bar rack (1/2" to 2" openings) hand cleaned
Sm--bar rack (1/2" to 2" apenings) mechanically cleaned
Sr----coarse rank (openings over 2")
St----garbage ground at plant and added to sewage flow

T -----Sludge thickener
Tc---cavered
Tm--stirring mechanism
To---open top

V -----Mechanical sludge dewatering
Vc---sludge centrifuge
Vv---rotary vacuum filter
Va---other

X -----Sludge disposal
Xb---barged to sea
Xd---used for fertilizer
Xf---burned for fuel
Xn---incinerated
Xp---used for fill

Z -----Sludge conditioning
Za---chemicals used, olum
Zc---chemicals used (unidentified)
Zi---chemicals used, iron salt
Zl---chemicals used, lime
Zx---no chemicals used
Zy---elutriation

APPENDIX B

LIST OF MAJOR AND MINOR BASINS

NE - Northeast

1 Quinnipiac River & Western Connecticut Coastal
2 Housatonic River
3 Pawcatuck River and Eastern Connecticut Coastal
4 Connecticut River
5 Thames River
6 Narragansett Bay

APPENDIX B (cont'd.)

NE - Northeast (cont'd.)

8 Massachusetts Coastal
9 Merrimac River
10 Piscataqua River and New Hampshire Coastal
12 Saco River and South Maine Coastal
14 Presumpscot River and Casco Bay
15 Androscoggin River
16 Kennebec and Sheepscot Rivers
17 Penobscot River
18 North Maine Coastal
19 St. Croix River
20 St. Johns River
21 Lake Memphremagog
24 Lake Champlain
25 St. Lawrence River
26 Lake Ontario
27 Lake Erie-Niagara River
28 Genesee River
29 Oswego River
30 Mohawk River
31 Upper Hudson River
32 Lower Hudson River

NA - North Atlantic

1 New Jersey - New York Metropoliton Area
2 New Jersey Coast
3 Delaware River - Zone 1
4 Delaware River - Lehigh
5 Delaware River - Schuylkill
6 Delaware River - Zone 2
7 Delaware River - Zone 3
8 Delaware River - Zone 4
9 Susquehanna River - North Branch
10 Susquehanna River - West Branch
11 Susquehanna River - Juniata
12 Susquehanna River - Main Stem
13 Upper Chesapeake Bay and Maryland Delaware Coast
14 Potomac River
15 Rappahannock and York Rivers - Virginia Coast
16 James River

SE - Southeast

1 Chowan River
2 Roanoke River
3 Tar River
4 Neuse River
5 North Carolina Coastal Area
6 Cape Fear River
7 Yadkin - Pee Dee Rivers
8 Pee Dee River
9 Catawba - Wateree Rivers
10 Congaree River
11 Santee - Cooper Rivers
12 Edisto - Combahee Rivers
13 Savannah River
14 Ogeechee River
15 Ocomee River
16 Ocmulgee River
17 Altamaha River
18 Satilla River
19 St. Marys - Nassau Rivers
20 St. Johns River
21 Suwanee River
22 Ochlockonee - St. Marks Rivers
23 Withlacoochee River
24 Tampa Bay Area
25 Peace River
26 Kissimmee River
27 Florida East Coastal Area
28 Lower Florida Area
29 Flint River
30 Chattahoochee River
31 Apalachicola River
32 Choctawhatchee River
33 Perdida - Escambia Rivers
34 Tallapoosa River
35 Coosa River
36 Cahaba River
37 Alabama River
38 Upper Tombigbee River
39 Warrior River
40 Lower Tombigbee River
41 Mobile Bay Area
42 Pascagoula River
43 Pearl River

TR - Tennessee River

1 Clinch River
2 Holston River
3 French Broad River
4 Little Tennessee River
5 Hiwassee River
6 Elk River
7 Duck River
8 Tennessee River - Main Stem and Minor Tributaries

APPENDIX B (cont'd.)

OR - Ohio River

1 Allegheny River
2 Monongahela River
3 Beaver River
4 Muskingum River
5 Little Kanawha River
6 Hocking River
7 Kanawha River
8 Guyandot River
9 Big Sandy River
10 Scioto River
11 Little Miami River
12 Licking River
13 Miami River
14 Kentucky River
15 Salt River
16 Green River
17 Wabash River
18 East Fork White River
19 West Fork White River
20 Cumberland River
21 Ohio Main Stem and Minor Tributaries
22 French Creek
23 Clarion River

LE - Lake Erie

1 Maumee River
2 Sandusky River
3 Cuyahoga River
4 Lake Erie Shore Line and Minor Tributaries

UM - Upper Mississippi

1 Red River of the North
2 Rainy River
3 Upper Portion Upper Mississippi River
4 Minnesota River
5 St. Croix River
6 Lower Portion Upper Mississippi River
7 Wisconsin River
8 Mississippi-Wapsipinicon and Tributaries
9 Rock River
10 Mississippi-Iowa-Cedar Rivers
11 Mississippi-Des Moines-Skunk Rivers
12 Mississippi-Salt Rivers
13 Chicago-Calumet Rivers
14 Des Plaines River
15 Kankakee River
16 Fox River
17 Illinois River
18 Mississippi River-St. Louis Area
19 Meramec River
20 Kaskaskia River
21 Big Muddy River
22 Mississippi River - Cape Girardeau Area

WL - Western Great Lakes

23 Lake Superior
24 Green Bay Western Shore
25 Fox-Wolf River
26 Lake Michigan Western Shore (Includes No. Suburbs of Chicago which drain to Lake)
27 Lake Michigan-Lake Huron North Shore
28 Lake Michigan Northeastern Shore
29 Muskegon River
30 Grand River
31 Kalamazoo River
32 St. Joseph River
33 Lake Huron Western Shore
34 Saginaw River
35 St. Clair-Detroit Rivers
36 Lake Erie Western Shore

MR - Missouri River

1 Upper Missouri River (Main Stem and Tributaries to below mouth of Milk River)
2 Yellowstone River
3 Missouri-Souris Rivers (Main Stem and Minor Tributaries from mouth of Milk River to Spring Creek including Devils Lake and Souris River)
4 Central Missouri River (Main Stem and Tributaries from above mouth Spring Creek to Niobrara River)
5 Niobrara River
6 James River
7 Big Sioux River
8 Lower Platte River from origin at North Platte, Nebr. to mouth)
9 North Platte River
10 South Platte River
11 Kansas River
12 Lower Missouri River (Main Stem and Minor Tributaries from Niobrara River to mouth)
13 Grand-Chariton Rivers
14 Osage-Gasconade Rivers

APPENDIX B (cont'd.)

SM - Southwest-Lower Mississippi

1 Upper Arkansas River above Kans.-Colo. State Line
2 Arkansas River Kans.-Colo. State Line to Tulsa, Okla.
3 Verdigris River
4 Grand (Neosho) River
5 White River
6 Lower Mississippi River - Cairo, Ill. to Helena, Ark.
7 Cimarron River
8 North Canadian River
9 Arkansas River - Tulsa, Okla. to Van Buren, Ark.
10 Arkansas River Basin - Van Buren, Ark. to mouth
11 Lower Mississippi - Yazoo Rivers
12 South Canadian River - above Tex.-Okla. State Line
13 South Canadian River - below Tex.-Okla. State Line
14 Washita River
15 Upper Red River - above Denison, Tex.
16 Lower Red River - below Denison, Tex.
17 Ouachita River
18 Lower Mississippi - Big Black Rivers
19 Atchafalaya River
20 Calcasieu River
21 Lower Mississippi River - Natchez, Miss. to Gulf

CR - Colorado River

1 Lower Colorado River
2 Middle Colorado River
3 Upper Colorado River
4 Gila River
5 Little Colorado River
6 San Juan River
7 Green River

WG - Western Gulf

1 Sabine River
2 Neches River
3 Trinity and San Jacinto Rivers
4 Brazos River
5 Colorado River (of Texas)
6 Guadalupe, Lavaca, and San Antonio Rivers
7 Nueces River
8 Pecos River
9 Upper Rio Grande - above Pecos Rive
10 Lower Rio Grande - below Pecos Rive

PN - Pacific Northwest

1 Kootenai River
2 Clark Fork-Pend Oreille Rivers
3 Spokane River
4 Yakima River
5 Columbia River - above Yakima Rive
6 Upper Snake River
7 Central Snake River
8 Middle and Lower Snake Rivers
9 Willamette River
10 Columbia River - below Yakima River
11 Puget Sound
12 Washington Coast
13 Oregon Coast
14 Southern Oregon Lakes

CL - California

1 Klamath River
2 North Coastal
3 San Francisco Bay Region
4 Central Coastal
5 Santa Clara River
6 Los Angeles River
7 Santa Ana River
8 San Diego Region
9 Sacramento River
10 San Joaquin River
11 Kings and Kern Rivers and Tulare Lake

GB - Great Basin

1 Northwestern Lahontan
2 Humboldt River
3 Central Nevada
4 Owens River
5 Mojave Desert
6 Colorado River - Region of California
7 Great Salt Lake
8 Sevier River

AL - Alaska

1 Southeastern Alaska
2 North Pacific Ocean
3 Bering Sea
4 Kuskokwim River
5 Yukon River
6 Arctic Ocean
7 Nootak-Koabuk Rivers

APPENDIX B (cont'd.)

HA - Hawaii

1 Hawaii Island
2 Kauai Island
3 Maui Island
4 Oahu Island

APPENDIX C

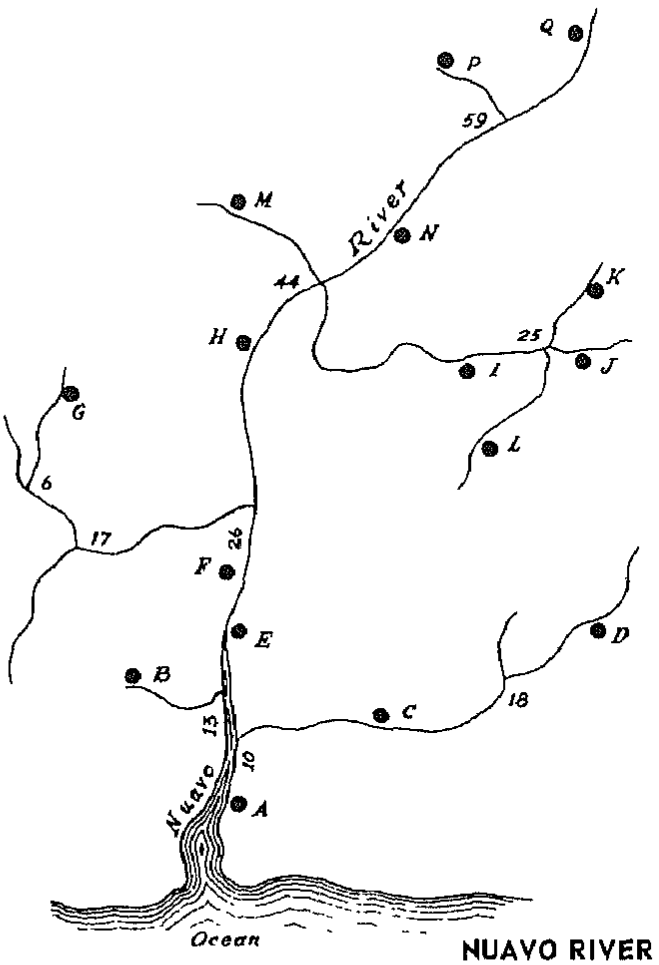
The watercourse mileage system is illustrated with reference to the accompanying diagram of the (hypothetical) Nuavo River minor basin.

Shown are the main stem of the minor-basin, together with those tributories on which sources of pollution are located. Tributories entering the main stem are located by mileages above the mouth of the main stem. Sub-tributaries are located by mileages above the mouth of the tributory into which they discharge, tertiary tributaries by mileages above the mouth of the sub-tributary into which they discharge, and so on for fourth, fifth, etc., tributories.

The watercourse mileage coding for each source of pollution on this river system is shown in the following table:

Source of Pollution	Watercourse Mileage
A	N5
B	N13-6
C	N10-10
D	N10-18-9
E	N18
F	N22
G	N26-17-6-5
H	N35
I	NR44-23
J	NR44-28
K	NR44-L25-6
L	NR44-R25-6
M	NL44-6
N	N52
P	N59-5
Q	N67

In each code symbol a letter - "N" in this case - appears first to denote the main stem concerned. The letter symbol is followed by numbers which locate by river mileage the particular source of pollution.



NUAVO RIVER
minor basin

The coding for three sources of pollution from the table is discussed more fully below:

1) Source D Code: N10-18-9
This source of pollution is located on a second tributary, which enters the first tributary 18 miles above its mouth. The first tributary, in turn, enters the main stem 10 miles above its mouth. The coding for "D" is then made up as follows:

N10 Indicates a point 10 miles above the mouth of the main stem

-18 A point 18 miles above the mouth of the first tributory

-9 A point 9 miles above the mouth of the second tributory

2) Source J Code: NR44-28
Located on a first tributory which enters the main stem 44 miles above its mouth. The coding for "J" is made up as follows:

NR44 A point 44 miles above the mouth of the main stem, on the right bank.

-28 A point 28 miles above the mouth of the first tributory

Note that in the coding for source "J" above, an additional letter - an "R" - appears after the "N" designating the main stem in the first part of the code. This "R" signifies that the tributary carrying pollution from source "J" enters the main stem on the right side, looking upstream. The second letter serves to differentiate this tributary from that entering directly opposite, on the left side of the main stem (see code for source "M"). The designations "R" and "L" are necessary only in situations of this type. The same principle may also be applied to similar conditions on tributaries, always looking upstream to define the right and left banks. This is shown in the next example.

3) Source L Code: NR44-R25-6
Located on a second tributory which enters the first tributory 25 miles above its mouth. The coding for source "L" is made up as follows:

NR44 A point 44 miles above the mouth of the main stem, on the right bank.

-R25 A point 25 miles above the mouth of the first tributory, on the right bank.

-6 A point 6 miles above the mouth of the second tributary.

In this case the "R" designation is necessary in the mileage coding of the first tributary since at this point another second tributory enters on the opposite (left) bank. Note that the coding for source "K" (NR44-L25-6) differs from that for source "L" only by the fact that it is located on a tributary entering on the left bank - looking upstream - of the first tributary.

In those cases where two or more main stems are located in one minor-basin, differentiation is made by the first letter of the code, i.e., the "N" in this case would distinguish sources of pollution on the Nuavo River from those on, say, the Cling River, if the latter was also in this minor-basin.

It may happen that two rivers having the same initial letter lie in the same minor-basin. In this case, a second letter will be used for distinction. Thus if, in addition to the Nuavo, the North River was also a main stem in this minor-basin, the Nuavo could be coded as given i.e., "N" while the North could be coded as "NO".

Major points to be reiterated are:

1) All mileages in the code are river mileages.

2) The zero point for mileages on the main stem is at the mouth of the main stem. The zero point for mileages on a tributary is at the mouth of the tributary.

3) For uniformity, right and left banks of the main stem and tributaries are located by looking upstream on the main stem or tributary concerned.

The data for this State have been collected with the helpful cooperation of the:

Connecticut State Department of Health
Sanitary Engineering Services

Connecticut State Water Resources Commission

INVENTORY OF MUNICIPAL WASTE FACILITIES
